BASIC GUIDELINES

- Woven Wood shades are fashioned from natural reeds, fibers and bamboo to help create both formal and informal settings for any room in the home.
- Multiple patterns offer distinctive textures, grains, colors, and styles that can change the mood of any room to exotic, casual, formal, or rustic.
- Reeds are woven together, retaining their natural textures and colors, offering a handcrafted look while still adding character and charm to the ambiance of any room.
- These stylish affordable shades can be manufactured with a simple pulley system, a continuous loop chain, or cordless lifting system.
- Numerous options including lining and duo shade systems are available to truly customize Woven Wood shades to suit any décor or scenario.
- AMS Signature Woven Wood shades are covered by a 1 year fabric warranty and a 3 year mechanism warranty.
- Box Surcharge – Shades 93” or wider (up to 3 shades per box) \$340.00 NET surcharge.
- Peak Season Surcharge will be charged as per FedEx or UPS at net cost (up to 10% of total order).

MEASURING GUIDELINES

MEASUREMENTS

Accurate measurements are essential for correct pricing and proper fit. Use only a hard-edged ruler or steel tape, never a cloth tape. For *inside mounts*, width measurements (A) should be rounded *down* to the nearest 1/8" to prevent blind from rubbing against the window casing.

BASIC GUIDELINES

Use a steel tape to measure the opening width (A) at three different places, and use the narrowest dimension when ordering. Be exact! The factory will make the shade 1/2" narrower so it will not rub against the window casing. Measure the height (B) of the window from the top (Soffit) down to the sill.

OUTSIDE MOUNT

Use a steel tape to measure the exact width (C) and height (D) of the area to be covered. It is recommended that the shades overlap the window by at least 1 1/2" on each side. When installation has no sill, allow the shade to overlap the bottom of the window casing by at least 1 1/2". Shade fabric will measure the exact width indicated on the order form.

108" to 120"	11"

HARDWARE OPTIONS

OVERVIEW

Woven Wood shades are created from natural products such as reeds, bamboo, grasses, and wood, that will age beautifully over time. It is possible that some patterns may grow slightly lighter or darker in color, depending on the fabric pattern. Variations in paint and stain, minor cracks, slight pattern irregularities and knots are all enhancements that add to the natural beauty and character of your shade. Standard Shade valance height is 7"

Cord Lock control is standard. Please specify control position. Clutch or Cordless options are available - Cordless Max. size 78" x 72"

CLASSIC ROMAN

Hangs flat when lowered and self valance is standard off front of Classic Roman Shades to neatly conceal shades hardware. Operated with a cord lock. Must specify cord lock position right or left. Cord lock right side is standard.

ROMAN WITH CLUTCH

Looks just like the Classic Roman, but has a continuous chain clutch mechanism for easier control and enhanced safety. Shaftwind system is a clutch system operated by a spear retainer and does not operate on a roller tube.

Note: Skyline system operates with a roller tube, standard on romans under 22" wide and large shades. Please specify system.

2-ON-1 OR 3-ON-1 HEADRAIL

Perfect for large windows, this style allows you to have two shades on the same headrail for independent control and more practicality. Price as separate shades and add together.

TOP-DOWN / BOTTOM-UP

Versatile, this style is perfect for those places where privacy is needed while still preserving a clear view to the outside and allowing natural light into the room.

LINER OPTIONS

See Available Liner Colors in the Gallery Sample Book

OVERVIEW

The materials to make Woven Wood shades have unique variations in both color and texture. The size and shape of the slats, reeds and grasses will affect spacing from shade to shade. This variation is normal and does not represent a defect in the material. Woven Wood shades alone will filter rather than block light. Some of the woven wood patterns will provide daylight privacy; however, for added night privacy, a liner upgrade is recommended.

If a liner is chosen, you must specify your liner option on your order (please refer to price grids for pricing information). Black or beige liner colors are great to coordinate with darker colored Woven Wood Shades, while white and ivory are perfect for lighter colors.

STANDARD VS OPERABLE

A standard Woven Wood shade liner is a fixed liner upgrade for consistent filtering or blocking of light. The liner will move with your Woven Wood shade but cannot be moved as a separate unit. An Operable Liner option is also available. This liner can be moved as a separate unit, which allows for more freedom in your light-filtering options.

HOW TO SPECIFY YOUR LINER

1. Choose your opacity: Light Filtering or Room Darkening.
2. Choose your color option from those shown below: (This is the color that will be seen slightly through the fabric spacing).

NO LINER

CHILD SAFETY & WARRANTY

CHILD SAFETY

Every product we send out meets or exceeds the latest safety standards as set forth by the Consumer Product Safety Council and the Window Covering Manufacturers Association. For enhanced safety, Automated Motorized Shades offers cordless and motorized window treatments.

REMEMBER THESE SAFETY RULES...

- For children's bedrooms only install window coverings that are cordless.
- Any window coverings in your home that were made before 2001, should be replaced with today's newer, safer models.
- Do not place furniture near windows that have window coverings with cords.
- Keep all cords out of reach from small children. Do this by securing tasseled pull cords out of reach with a cord cleat, and anchoring continuous-loop cords to the wall with safety devices.
- Always be sure to lock and firmly secure cords in position.
- Products such as Roman or Woven Wood Shades that have accessible back cords, should not be installed within reach of children.

All products come with safety labels attached. This is to help raise awareness of the potential safety risks associated with the products you purchase. If you have any concerns, please do not hesitate to contact us directly. You may also directly contact any of the associations that create the safety standards with any questions or concerns. Child safety is our top priority!

WARRANTY

Automated Motorized Shades guarantees all products manufactured in our facility to be free from defects due to faulty workmanship and/or materials. We are so confident about our quality and dependability that we back our manual shades with a limited lifetime warranty, our motors with a 5 year limited warranty, and our custom printed shades with a 3 year warranty against fading. All warranties are effective from the original invoice date of the product.

This guarantee does not apply to damage to exterior shades caused by high winds and/or extreme weather conditions. Any roller shade or parts which fail due to abuse, accident, theft, alterations, improper use or

installation, or gradual color fading, are also excluded from this warranty.

Automated Motorized Shades reserves the right to inspect products and will replace or repair any product found to be defective as a result of faulty workmanship or materials.

Shipping charges, trip charges and labor costs for measuring and installation and/or removal of old or current products are excluded. This

warranty is available to the original owner/purchaser and is non-transferable. Automated Motorized

Shades' warranty is designed to ensure a thoroughly satisfying experience with your window treatment product. Certain restrictions may apply.
