

SMART SHADE SOLUTIONS

OUR COMPANY

Automated Motorized Shades®

With 3 generations of combined experience, Automated Motorized Shades® is firmly seated as the leader in the window treatment industry.

We offer our dealers motorization solutions for all of our manufactured products, making us the #1 choice for your window covering needs. Upgraded customer management systems, new product offerings, and our commitment to quality are why our customers prefer to use Automated Motorized Shades®.

The automation of window treatments is the fastest growing segment of the window covering industry. When combined with a home automation system, the use of motorized window treatments, whether battery powered or hard-wired, have proven to be more efficient and safer when compared to manual window treatments.

From concept to completion, let us partner with you to deliver the ultimate window treatment solution to your customer. Our products are available exclusively through our valued dealer network and are all manufactured in the USA.

PRODUCTS

Roller Shades —

Available in a wide array of styles, colors, and patterns, roller shades are the perfect choice to solve most window covering needs. From light filtering to blackout fabrics, from small windows to oversize openings, Automated Motorized Shades® has got you covered.

With options to motorize shades using sun sensors, timers and/or pre-set scenes, we can help design the right shade solution for your application. You can even ask “Alexa®” to close your shades for you.

Parallel Shades —

Whether using a chain operated clutch control or a battery motor, Parallel Shades effortlessly slide their opaque and translucent woven stripes past each other. The front layer moves independently of the back allowing the panels to glide past each other creating an open and closed effect, allowing for limitless light control.

Numerous motorization and integration options are available to compliment the entire Parallel Shade collection. The exceptional Parallel Shade line features sheer metallics, delicate subtle tones and natural wood weave effects making this collection the perfect choice for any room in the home.

Woven Shades —

The Woven Wood Collection features bamboo, reed, exotic grass and woven blends from around the world. These natural materials and weave patterns combine to give each shade a uniquely beautiful appearance.

Woven wood shades are available with numerous control and privacy options that create a stylish, functional window covering to fit any decor. Combining old world style and modern motorization technology, let Automated Motorized Shades® put your windows in motion.

APP CONTROL

Make any window treatment a “smart” window treatment

Whether connecting shades directly to home automation systems, integrating window treatments into smart hubs, or even utilizing your home's Wi-Fi connection, there is an automation or integration option available to suit your needs and Automated Motorized Shades® is here to help.

Today's homes are smarter than ever before. Many shade control systems use an available Wi-Fi connection that allows you to control your window coverings, even while you are away from home. Using your iPhone® or Android® device, apps are available to program your shades to a timer, set room scenes, and remotely access your window treatments.

Somfy MyLink App

Fibaro App

Smart Hubs

Many smart hubs are also available to control and integrate Roller Shades, Roman Shades, Honeycomb Shades, and Woven Wood Shades into a home automation system using, Wi-fi, Z-Wave®, Bluetooth®, and Zigbee® technologies. Automated Motorized Shades® can help you choose the right option to integrate with any shade application.

VOICE CONTROL

Easily connect with voice activated controls including Amazon® Echo® using one of today's available compatible smart hubs, or connect directly to your voice activated control utilizing “smart” motors with built-in communication technology.

CUSTOM SOLUTIONS

Solutions for Every Project

At Automated Motorized Shades® we know that not all projects are created equal. Whether your customer wants a simple “do-it-yourself” motorized shade system, or needs to add motorized shades to an existing home automation network, we can help guide you and your customers. Our expert team is always ready to answer your window treatment questions.

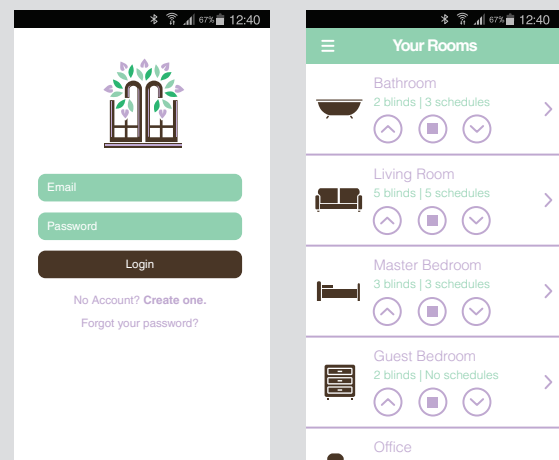

Branded Controls

At Automated Motorized Shades®, we know how important it is for your brand to be a household name. That is why we offer custom branding on remotes and wall switches.

Branded App

Imagine a user-friendly custom app that would allow customers to raise, lower and program their shades via Android® or Apple® devices. Utilizing a custom app tailored to your company increases brand awareness and improves customer loyalty. Automated Motorized Shades® has the ability to develop a custom app that compliments your “smart” motorization applications.

HOME AUTOMATION BENEFITS

Easy Control

Simplify control of your smart window treatments by using today's available technology. Smart hubs, control interfaces, and voice activated controls are available to make controlling your window treatments easier than ever. Even control your window coverings when you're not at home using available iPhone® and Android® apps. Integration options are available to connect into an existing home automation system.

Energy Savings

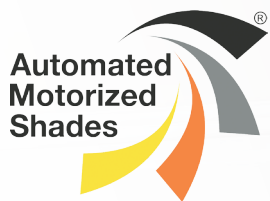

You can set your window treatments to timed events, connect to a sun sensor, or program "scenes" using many home automation solutions. This can help "keep out the heat" and raise your "cool" factor at the same time. Using a timer for shade control can help prevent excessive glare and heat gain, especially when combined with a shade made from materials with superior solar properties. This can help save energy and make your window treatments even more efficient.

Simplicity and Beauty

Program your shades to go up during the day, or down at night. Set a "scene" to maximize light and shading in any room. Put your window treatments at just the perfect spot. All of these options are available at the touch of a button. Add beauty and functionality to any home using one of the many available smart home solutions.
